PREMIUM COLLECTION

Engineered Stone.
Printed to Perfection

Unrivalled Natural Stone Realism

Experience marblelike veining, granite depth, and subtle mineral textures reproduced with pixel precision. Using cutting-edge high-definition Nano-Ink printing, our slabs replicate the natural flow of stone, and even penetrate up to 1 mm into the surface for lasting visual depth and realism.

Coordinated Surface and Edge Finish

Each slab features a high-definition printed surface complemented by a colour-coordinated base, assisting to create the look of continuous veining and harmonious colour from surface to edge. The colour-coordinated base helps to maintain a consistent appearance in cut sections and corner profiles, ensuring your design remains refined from every angle.

Engineered Performance. Elevated Design

Built on a nonporous nano glass, frit, and resin matrix, our printed slabs are ultradurable and easy to maintain. They resist scratches, stains, and heat, with no sealing needed. Cleaning requires only mild soap and water.

Built for High-Traffic Spaces

Ideal for kitchens, bathrooms, commercial foyers, and wall cladding, where durability and hygiene are critical. The engineered surface means no moisture absorption and no bacteria build-up.

Design Highlight: Taj Mahal

Transform Any Space

 Kitchen Countertops

 Bathroom Countertops

Residential Applications

- Kitchen and bath countertops
- Vanity tops
- Stairs, furniture, and window sills

Commercial Applications

- Feature walls and reception desks
- Elevator interiors
- Hospitality spaces and backlit bar designs

 Wall Cladding and Backsplashes
